

Senior Back End Developer / Architecture

Job-type: Remote (or on-site in Malaysia)

Job-function: Engineering

Location: New Zealand, Australia, Malaysia, Remote

Responsibilities:

We are on the journey to modernise our architecture and need your skills to scale our microservices, Node JS, PHP and Vue JS platform. In this role, you will be required to:

- Effectively lead technical teams, and provide mentorship and guidance to team members.
- Take ownership and responsibility for the end-to-end development and delivery of the backend application including the architecture, design, and implementation.
- Work in cross-functional teams, across multiple platforms, to ensure that we are giving the best experience possible for our customers.
- Identify and address performance bottlenecks and QA code.
- Work with large-scale, highly available, and resilient modern financial systems.

Naturally, you will enjoy working in a complex technical landscape and thrive in a fast-paced and dynamic environment. Most importantly, you are a team player who is passionate about what you do and motivated by your desire to build a successful career within Easy Crypto.

Skills/Experience/Qualifications:

Required

- 8+ years of development experience with a proven background in developing backend solutions.
- Strong JavaScript, Node JS, PHP, scripting, HTML, CSS experience with a passion for quality code.
- Proven passion for clean code and software craftsmanship.
- Experience in developing web user interfaces utilising technologies such as PHP, Vue JS, React, Javascript, CSS, Node JS, etc.
- Proven strong understanding of at least a framework/library, e.g. Laravel.
- Excellent database experience in MySQL/MariaDB and/or NoSQL.
- Intimate knowledge of cross-browser and cross-device development.
- Experience in microservices architecture and with RESTful web services.
- Experience in testing and documentation.
- Demonstrable previous experience leading a team.
- Experience in agile methodologies including scrum, CI/CD, etc., and experience with TDD and/or BDD.
- Knowledge and understanding of microservices architecture.
- Understanding of principles such as SOLID, DRY, WET.
- Ability to clearly articulate complex architectural and technical problems.
- A passion for teamwork with a proactive attitude.
- Outstanding collaboration, analytical and problem-solving skills.

Desirable

- Passion for clean design and library-grade coding.
- Experience working with teams across different time zones.
- A passion and desire to contribute to high-impact projects in a fast-paced organisation.

Salary commensurate with experience. Please state your expected salary in your application.
